

For Immediate Release:

Pearson Medical Technologies Releases its Next Generation Universal Automated tablet/capsule Feeder.

Alexandria, Louisiana, US, July 19, 2013, - Pearson Medical Technologies, a leader in safe and efficient pharmacy automation, is pleased to announce the release of its second generation IntelliCount® Universal Automated Tablet/Capsule Feeder.

The new IntelliCount® Automated Universal Tablet/Capsule Feeder features a smaller, completely self-contained design, and has been modified to increase its speed, efficiency and accuracy. The patented IntelliCount® is designed as an add-on option for Pearson's iPack®Rx Unit Dose Packager and allows for unattended unit dose packaging operations. The IntelliCount® utilizes a combination of vacuum and 5 interchangeable pill disks – each capable of counting hundreds of different capsules or tablets -- to accurately count any type of pill, including odd shaped pills, gel caps, and fractional tablets. The use of vacuum to capture the tablet or capsule allows the IntelliCount® to safely count and deliver any type of pill into the iPack®Rx Unit Dose Packager without damaging even the most brittle tablet.

To see a video demonstration of the IntelliCount Automated Universal Tablet/Capsule Feeder with the iPack®Rx Unit Dose Packager, go to <http://www.ipackrx.com/video.html>.

“The new IntelliCount® combined with our patented iPack®Rx Unit Dose Packager and m:Print Bar Code Labeling Software offers unprecedented efficiency, accuracy, and ease-of-use in unit dose packaging for oral solid medications. With the new regulations requiring medication administration tracking as a component of “meaningful use” in the adoption of electronic health records, every hospital pharmacy should consider this very cost-effective packaging solution,” stated Brent Pearson, CEO of Pearson Medical Technologies.

About Pearson Medical

With over 50 years of experience and a pioneer in pharmacy automation, Pearson Medical Technologies creates safe and efficient medication delivery solutions for hospital, long term care and retail pharmacies, including bar coded unit dose and multi-dose medication packaging systems and labeling software.
